

(1) Front path when you arrive.

(2) Turn area off the front path to the backyard. This gate will be modified to make this turn area wider.

(3) After the turn area, a large grassy area leading to the backyard.

(4) In the backyard – a long, grassy area you follow to the 'stage' area. Note there is some bumpiness here.

(5) After a bit of a decline, you come to a slight incline through this archway. This photo was taken after a rain, but even damp, the ground here is firm.

(6) The audience area, where you can either watch the show or gaze at a yellow magnolia tree!

(7) Entrance to washroom, located close to (4). The patio is on the same level as the grass. These stairs will be removed and replaced with a ramp. We have been advised that longer ramps are best, so we will arrange this space with that in mind. The washroom is directly to the right of the door.
